CAREER SUMMARY

Creative and detail-oriented Senior Designer & Web Developer with over 3 years of experience in building responsive, scalable, and user-centered web applications. Proficient in both frontend and backend development using modern technologies such as **React, Next.js, TypeScript, Node.js, PHP, and Express.js**. Skilled in crafting seamless user interfaces from design to deployment, with a strong command of **HTML, CSS, JavaScript**, and **mobile-first design principles**.

Experienced in collaborating with designers and content teams to transform UI/UX concepts into high-performance, accessible web solutions. Well-versed in **Adobe Creative Suite (Photoshop, Illustrator, XD)** and design tools like **Figma**. Adept at designing and managing **robust databases** using a wide range of technologies including **SQL (PostgreSQL, MySQL, SQL Server)** and **NoSQL databases like MongoDB**, ensuring data efficiency, scalability, and performance optimization. Also experienced with **content management systems (CMS) such as WordPress and Drupal**, enabling flexible and dynamic content delivery. Continuously updated with the latest industry trends, with a passion for writing clean, maintainable code and improving performance through best development practices.

PROFESSIONAL EXPERIENCE

Nano2Soft Company

Jan 2024 – Present

Frontend Developer

- Designed and developed user-friendly web interfaces using Next.js, React, TypeScript, and Tailwind CSS.
- Ensured optimal performance, accessibility, and responsiveness across various devices.
- Integrated APIs and collaborated with backend teams to enhance user experiences.
- Implemented dynamic UI components and reusable design systems.

APPTech Systems Diş Tic.Ltd.Şti. (Internship) – Istanbul

Mar 2023 – Sept 2023

Full-Stack Web Developer

- Engaged in both frontend and backend development.
- Developed responsive and interactive UI/UX for web applications.
- Used Node.js and Express.js for backend services and REST API integration.

EDUCATION

Samsun University . Faculty of Engineering and Natural Sciences . Turkiye
Bachelors of Software Engineering

2024

PROJECTS

Graduation Project

AI-Powered Multimedia Information Extraction

Developed an AI-based platform to extract and analyze content from videos, audio files, PDFs, and documents—enhancing data interaction for education and research.

Machine Learning Project: Rental Price Prediction in Samsun & Istanbul

Built a complete ML pipeline in Python to predict rental prices using location and property data, including scraping, preprocessing, model training, and visualization.

Tyseir – Online Marketplace

Created a fully responsive marketplace using TypeScript, Next.js, and Tailwind, featuring advanced product filtering, dynamic listings, and accessibility with light/dark mode.

E-Commerce Frontend Platform

Developed a mobile-first, high-performance e-commerce frontend with optimized UX, smooth navigation, and responsive design using Next.js and TypeScript.

Haraj Tashlih – Salvage Car Marketplace

Built a bilingual platform for buying and selling salvage cars and spare parts, with powerful search, filters, product details, and user-friendly design in both light and dark modes.

Rydan Restaurant – Online Ordering System

Designed and developed a bilingual restaurant website with interactive branch maps, rich menus, cart and checkout features, and user dashboards for addresses and loyalty points.

Khayat Althawb – Tailoring Platform

Created a responsive website for custom thobe orders, enabling users to select fabric, design, and request in-home tailoring visits, with bilingual support and seamless UX.

Köfteci YUSUF – Full-Stack Food Ordering App

Developed a full-stack food delivery app using MERN stack with user authentication, shopping cart, Stripe integration, and admin dashboard for order and status management.

CERTIFICATIONS

The Complete Full-Stack Web Development Bootcamp	Udemy
The Ultimate React Course 2025: React, Next.js, Redux & More	Udemy
Development of Human Resources Skills Diploma	International Electronic University
Introduction to Cyber Security	Cisco Networking Academy
Algorithms and Data Structures (Advanced)	BTK Akademi
An Introduction to Web Applications Architecture	The Open University
Systems Diagramming	The Open University

TECHNICAL SKILLS

Frontend Development: HTML, CSS, JavaScript, TypeScript, React.js, Next.js, Tailwind CSS, Bootstrap

Backend Development: Node.js, Express.js, C#, ASP.NET (MVC), Entity Framework, PHP, RESTful APIs

Databases: SQL Server, SQLite, PostgreSQL, MongoDB

Design Tools: Adobe Illustrator, Adobe Photoshop, Adobe XD, Figma

AI & Machine Learning: Python (TensorFlow, Scikit-learn, YOLO), Data Analysis, Predictive Modeling

Tools: Git, GitHub, Postman, Webpack, Visual Studio, VS Code, Google Colab, Anaconda

Other Technologies: SEO Optimization, CMS (WordPress, Drupal), Responsive Design, Web

Performance Tuning, Application Scalability, Troubleshooting & Debugging, Code Review Practices, Web Analytics Tools, SOLID Principles, Flutter

LANGUAGES

- Arabic (Native)
- Turkish (Fluent)
- English (Intermediate)

ADDITIONAL INFORMATION

- Passionate about web development, UI/UX design, and creating real-world solutions through innovative and scalable code.
- Strong commitment to continuous learning and staying up-to-date with modern frameworks, tools, and industry trends.
- Skilled in writing clean, maintainable, and performance-optimized code, with keen attention to detail.
- Experienced in debugging, troubleshooting, and enhancing application scalability and usability.
- Effective communicator and team player, with a proven ability to collaborate across cross-functional teams.
- Actively engaged in code reviews, applying best practices and clean code principles.
- Highly reliable and self-motivated, with a strong sense of ownership and accountability in project delivery.
- Familiar with agile development environments and adaptable to fast-paced, evolving project requirements.
